

AGRISURE

PLATFORM TERMS & CONDITIONS

Assured Contract Farming System for Stable Market Access

Effective Date	10/06/2026
Last Updated	02/10/2026
Applicable To	Farmers, Companies/Buyers, Administrators and other authorized users
Platform	AgriSure

1. ACCEPTANCE OF THESE TERMS

These Terms & Conditions (“Terms”) govern access to and use of the AgriSure platform (“Platform”). By registering, logging in, accessing, browsing or using AgriSure, a user acknowledges that they have read and understood these Terms and agree to comply with them.

If a user does not agree with these Terms, the user should not create an account or use the Platform.

2. ABOUT AGRISURE

AgriSure is a digital platform designed to facilitate assured contract farming and stable market access by connecting farmers and companies/buyers and providing features for crop discovery, communication, contract management, payment milestone tracking, crop updates, documents and administrative oversight.

AgriSure provides digital tools and records for transactions between users. Unless expressly stated otherwise, AgriSure is not itself the farmer, buyer, seller, producer, transporter, inspector, insurer or financial institution involved in a particular agricultural transaction.

3. ELIGIBILITY AND USER INFORMATION

- Users must provide information that is accurate, complete and reasonably current.
- A user must use an appropriate identity and role when registering, such as Farmer or Company/Buyer.
- Users are responsible for updating information that becomes inaccurate or outdated.
- AgriSure may require email verification, OTP verification or other account-verification steps before enabling certain features.
- Where a user is registering on behalf of an organization, the user represents that they are authorized to provide the organization's information.

4. REGISTRATION AND ACCOUNT CREATION

- The registration process may require name, email address, contact information, role-specific profile information and other required fields.
- Email or OTP verification may be required to activate an account.
- Users must not create accounts using another person's identity, misleading information or unauthorized organizational details.
- AgriSure may reject, suspend or require additional verification for an account where information appears incomplete, misleading, fraudulent or inconsistent with platform requirements.

5. LOGIN AND ACCOUNT SECURITY

- Users are responsible for keeping passwords, access tokens, OTPs and other authentication credentials confidential.
- Users must not share login credentials or intentionally allow unauthorized persons to access their account.

- Users should immediately report suspected unauthorized access or compromised credentials to the Platform administrator/support channel.
- AgriSure may use authentication, authorization and session controls to protect accounts and platform resources.

6. FARMER USE OF THE PLATFORM

- Farmers may create and maintain their profile and submit crop listings containing information such as crop name, variety, cultivation area, expected quantity, price, farming method, quality grade, irrigation type, sowing date, harvest date and delivery location.
- Farmers are responsible for the accuracy of crop information and should update material changes promptly.
- Submitting a crop listing does not by itself guarantee a contract, sale, payment or minimum market price.
- Farmers should review all commercial terms before accepting a contract.

7. COMPANY / BUYER USE OF THE PLATFORM

- Companies/Buyers may maintain business profiles, discover available crops, communicate with farmers and submit contract requests subject to Platform features.
- Companies/Buyers are responsible for the accuracy of their business and procurement information.
- A request, negotiation or message does not automatically create a final contract unless the required acceptance process has been completed.
- Companies/Buyers should review crop, quantity, price, quality and delivery terms before accepting a contract.

8. DIGITAL CONTRACTS

- AgriSure may provide digital contracts containing farmer and buyer details, crop information, quantity, price, payment milestones, delivery terms, quality requirements and other agreed conditions.
- A contract becomes active according to the acceptance/status workflow implemented by AgriSure.
- Users must review the contract before accepting it.
- Material changes should be made through the authorized contract amendment or versioning process.
- Users should retain copies of important contract information and supporting records.

9. PAYMENT TERMS AND MILESTONES

Where the AgriSure contract specifies milestone-based payment, the standard project workflow may record a 20% advance payment and an 80% final payment after the applicable delivery/release and acceptance conditions are satisfied.

- Payment status shown on the Platform is a digital record of the relevant milestone and should be checked against the applicable transaction record.
- AgriSure does not guarantee payment where a user or external payment process fails to complete an obligation.
- Users must not submit false payment confirmations, transaction references or supporting documents.
- Any refund, adjustment, deduction or disputed amount is subject to the applicable contract terms and relevant legal requirements.

10. CROP DELIVERY, QUALITY AND INSPECTION

- Users must follow the delivery, quantity and quality conditions recorded in the applicable contract.
- Crop inspection or verification information may be recorded on the Platform where such functionality is available.
- AgriSure may provide a digital record of inspection or acceptance but does not automatically guarantee the physical quality, quantity or condition of agricultural goods.

- Discrepancies should be reported and documented through the available contract or dispute process.

11. COMMUNICATIONS AND NOTIFICATIONS

- AgriSure may provide messages, notifications, contract-status updates, payment-status updates, verification notices and other service communications.
- Users are responsible for reviewing important notifications associated with their account and contracts.
- Users must not use Platform communication features to send unlawful, threatening, abusive, fraudulent, misleading or irrelevant content.

12. USER CONTENT AND DOCUMENTS

- Users may upload or submit crop information, business information, documents, images, messages and other content required by Platform features.
- Users represent that they have the necessary rights and authority to submit such content.
- Users must not upload malicious files, illegal content, confidential information belonging to another person without authorization, or intentionally false documents.
- AgriSure may retain relevant records as necessary for providing the service, maintaining contracts, resolving disputes, security and other legitimate platform purposes.

13. PROHIBITED ACTIVITIES

- Fraud, impersonation, identity misuse or submission of materially false information.
- Attempting to access another user's account, data or restricted administrative functions.
- Interfering with Platform security, authentication, APIs, servers or databases.
- Uploading malware or intentionally harmful code or files.
- Using the Platform for illegal transactions or activities.
- Manipulating contract, payment, crop, inspection or verification records.
- Using Platform data to harass, deceive, spam or harm another user.

14. ADMINISTRATION AND PLATFORM MONITORING

AgriSure administrators may review user accounts, verification status, contract records, submitted content and platform activity where necessary to operate and secure the Platform. Administrative actions may include verification, correction requests, suspension, restriction or removal of accounts or content in accordance with Platform rules and applicable law.

15. ACCOUNT SUSPENSION OR TERMINATION

- AgriSure may suspend or restrict an account when there is a reasonable basis to believe that the account violates these Terms, creates a security risk, contains materially misleading information or is involved in prohibited activity.
- A user may request account closure subject to completion or resolution of applicable contractual, financial, legal or administrative obligations.
- Termination of Platform access does not automatically cancel an existing farmer–buyer contract or remove obligations that arose before termination.

16. PLATFORM AVAILABILITY

AgriSure is intended to provide continuous digital access where reasonably possible, but temporary interruptions may occur due to maintenance, software issues, network failures, hosting problems, security events, third-party services or other circumstances. Platform availability is therefore not guaranteed at every moment.

17. ACCURACY OF PLATFORM INFORMATION

AgriSure may display information submitted by users. Users should verify important commercial, crop, payment and contract information before relying on it. A platform display, recommendation, listing or status indicator should not be treated as an independent guarantee of the underlying real-world facts unless expressly stated.

18. PRIVACY AND DATA PROTECTION

AgriSure may collect and process account, identity, contact, crop, business, contract, communication and platform-activity information required to provide and secure the service. Personal information should be handled according to the Platform's applicable Privacy Policy and relevant data-protection requirements.

19. INTELLECTUAL PROPERTY

The AgriSure name, branding, interface, software, original documentation and platform design elements may be protected by applicable intellectual-property laws. Users receive permission to use the Platform for its intended purpose and do not receive ownership of AgriSure's underlying software, branding or other protected materials.

20. THIRD-PARTY SERVICES

AgriSure may depend on third-party services such as email delivery, hosting, payment processing, authentication or other infrastructure. Where a third-party service is used, its own terms and policies may also apply. AgriSure does not control all third-party systems and cannot guarantee their uninterrupted availability.

21. DISCLAIMERS

AgriSure provides a digital platform for facilitating agricultural contracting and related records. Unless expressly stated in a separate agreement, AgriSure does not guarantee crop yield, market price, buyer demand, farmer income, delivery outcome, payment completion, product quality, weather conditions or the performance of another user.

The Platform should not be treated as legal, financial, agricultural, insurance or professional advice. Users should obtain appropriate professional advice where required.

22. LIMITATION OF RESPONSIBILITY

To the extent permitted by applicable law, users remain responsible for their own decisions, information, contracts and interactions with other users. Nothing in these Terms is intended to exclude or limit responsibility that cannot legally be excluded or limited.

23. DISPUTES BETWEEN USERS

Disputes between a Farmer and Company/Buyer should first be addressed through the communication and dispute-resolution mechanisms provided by AgriSure. Where a dispute cannot be resolved through the Platform, the parties may use an appropriate legal or dispute-resolution forum under applicable law. AgriSure's role is primarily to provide the digital platform and records unless a separate written agreement states otherwise.

24. CHANGES TO THESE TERMS

AgriSure may update these Terms when the Platform, features, legal requirements or operating practices change. The updated version should display a new effective or update date. Continued use of the Platform after an applicable update may constitute acceptance of the revised Terms to the extent permitted by law.

25. GOVERNING LAW

These Terms shall be interpreted and applied according to the laws applicable to the AgriSure service and the user's transaction, subject to mandatory legal rights and jurisdictional requirements. The final production version should be reviewed by a qualified legal professional for the jurisdiction in which AgriSure will operate.

26. CONTACT AND SUPPORT

Platform	AgriSure
